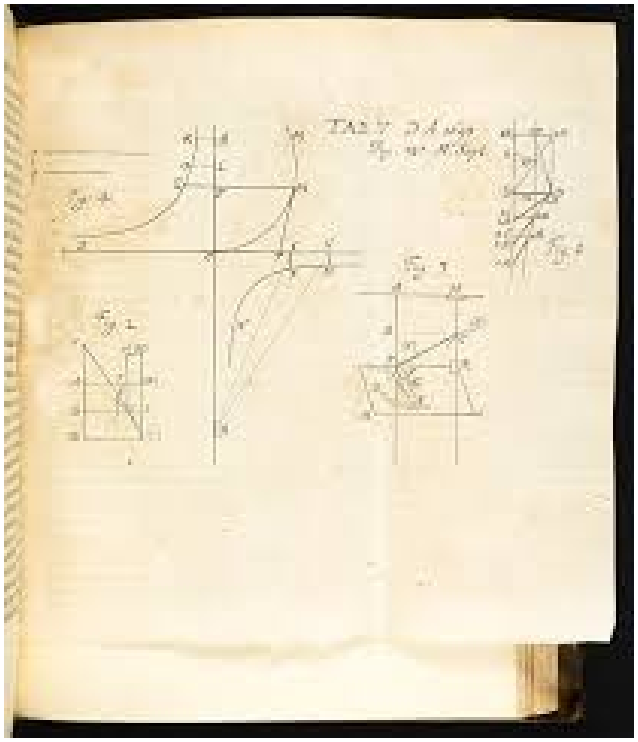
Individualismo y La Arte V – Marxismo y Sirohianismo – La Differencia y la Similaridad



By Shomit Sirohi

Introduction

By Istabal Mesravan

I mean for Soviets it is all the same thing dialectics. It is born Sirohi recently explained, from philosophy and dialectics elegantly covering each discipline and this is Soviet Marxism and dialectics which then is opposed to unique Borges which it becomes if it is unique only and at all times.

Sirohi is an old Marxist – the difference he jokes is that he is more consistent at Marxism than others. He makes experimental and anarchist frank conversation a lot.

I also mean that we admire Spanish, the language and not just in fact the Arab writings of Sirohi alone which is the Arab continent joined in Sirohi to the reflection of their heritage. I mean then Sirohi means all of that. He also means a detail in Southern Magrib in Egypt is called the Detail which then produces a whole analysis of wage and living culture and becomes a complex wage analysis in his novels and is then more complex than Marx. He aids Finance in America a lot. Call him a sheer genius who is with the scientists like Feynman and Bohr, even Einstein. He is inventive they argue, on covering so much God, non-linear and linear geometry mainly according to their calculus.

I mean this is infinity finally being talked about in the world. I am glad about the Volumnus for Soviet culture and law we would apply today. I mean such words as well. Like Alumni of a University and its Integration to a Cathedros, or Tome like stuff Sirohi would joke. Love the jokes.

I. Marxismo es sciencia

Marxismo es sciencia, tienes que entender la mode de producción. Tambien la structura y agencia debates de hombre que hace historia pero en condiciones de transmita del pasado.

II. Sirohi es mas sciencia, como la superstructura de Marxismo

Quando hace Marxismo, la materialista dialectica. Y la cambia a la superstructura de dialectica sistema or systematicamente. Mas systematicamente. Esto es la diferencia, que es la misma para Marxistas, mas consistente una Marxista, solo.

III. Marxismo y Sirohianismo – Trotskyismo y Maoismo

Finalmente una Maoista también. La Chinesa, y su proceso de militant política gesturas. La cambia la vida de scientistas Marxistas como yo – hace la praxismo hace metódicamente.
